## EZ LOAD LADDER RACK

### EZ LOAD LADDER RACK BY ADRIAN STEEL

Designed with the average height person in mind, the EZ Load Ladder Rack is the most functional, easy to use grip lock style ladder rack on the market.

UP & LOCKED POSITION

#### EZ to Operate

Loading ladders just got easier! Taller cargo vans and longer ladders make it difficult to load ladders, until now. The EZ Load rack's patent pending design brings the rack down 6" towards you so you don't have to reach the roof of your van to load and unload ladders. Much closer than any comparable grip lock rack on the market today.

#### EZ to Adjust

Ladders come in all shapes and sizes. The EZ Load ladder rack has one common fastener versus comparable grip lock racks with different fasteners for different brackets. All you need to adjust your EZ Load Rack for your ladders is a 1/2" socket.

LOWERED POSITION

#### EZ to Maintain

Corrosion Free! The all aluminum design with stainless steel fasteners allow the EZ Load to look great for years to come!

#### EZ to Accessorize

The new T-Slot design makes adding accessories EZ! Add a stepladder kit, conduit carrier or utility rack kit with ease!

Crossbar with T-Slot and square-head bolts.

Plastisol coated brackets and plastic contact surfaces protect ladders from excessive wear.

## EZ LOAD LADDER RACK

### NEW DESIGN OFFERS BETTER ERGONOMICS!

Cargo vans are getting taller each year and most grip lock style ladder racks do not take this factor into their design. The average height person in North America is 5'8" (according to the CDC) and the taller the cargo vans get, the harder it is to load a ladder on top of these vans. The patent pending design of the EZ Load Ladder Rack brings the ladder down 6" towards the operator. Making it easier to reach when you unload and more importantly, when the operator has to load the ladder, they no longer have to lift the ladder to the top of the cargo van reducing the risk of injury!

- **Ladder Protection** – Ladders stowed on the EZ Load Ladder Rack are protected with composite plastic that keep fiberglass ladders from rubbing on the metal of the ladder rack. This prolongs the life of your fiberglass ladders.
- **Safe Ladder Transportation** – No bungee cords needed. Four brackets secure the ladder tightly in place during transportation. Proper adjustment should take place when you first load your ladders on the EZ Load Rack.
- **Ladder Security** – Ladders can be secured against theft with an optional padlock.
- The EZ Load Ladder Rack accommodates 10' – 36' extension ladders and 8' step ladders. Shorter ladders can be accommodated with the optional step ladder kit.

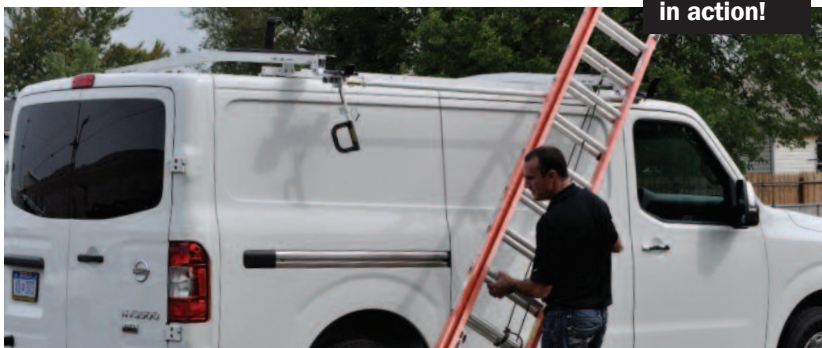

**Pull to release the handle, swing out and down to lower ladder.**

**Lift ladder off the rear bracket.**

**Scan to see the EZ Load in action!**

**Lower ladder to the ground, resting the top of the ladder on the front bracket.**
